SPECIALTY PRODUCTS

**A-STRIP**  
Ammoniated Super Wax Stripper

**HIGHLY CONCENTRATED WORKS WELL MIXED WITH HOT OR COLD WATER**

**Product # 5080**

**FOR PROFESSIONAL USE ONLY  
CONSULT LABEL AND MSDS BEFORE USING.**

**A-STRIP**

**Ammoniated Super Wax Stripper**

**A-STRIP** is highly concentrated, designed to strip most sealers and floor finishes including metal cross linked polymers. **A-STRIP** will quickly break up and emulsify old build up of polishes, thus preventing redeposition and making for efficient rinsing and removal. **A-STRIP** is powerful but safe for all floor surfaces.

**DIRECTIONS FOR USE:**

Apply solution to floor. Let stand for 5 minutes (do not allow to dry). Machine scrub with synthetic pad. Rinse floor well with clear water. This product is effective in all types of water, hot or cold, hard or soft.

**DILUTION RATES:**

**Extremely heavy wax or finish build up:**

1 part stripper to 15 parts water.

**Normal wax or finish build up:**

1 part stripper to 25 parts water.

**Additional Information**

**A-STRIP** Ammoniated Super Wax Stripper is a concentrated product designed for old, heavy wax or finish build up removal. Schools, hospitals and sports arenas are just a few of the facilities that are notorious for applying new floor finish over the old wax. This may make the traffic lanes look good enough but the lower traffic areas near the walls and corners will start to build up dozens of layer of finish. This heavy build up is what **A-STRIP** was designed to remove. This heavy duty ammoniated stripper is effective on wax, sealers, urethane, acrylic and metallic finishes. Under the conditions stated above, you may have a build up that is composed of many or all of these materials. Most common strippers are made to remove only one type of finish. **A-STRIP** will remove any kind of finish quickly and easily with either hot or cold water. The time involved in stripping and refinishing floors is too great to gamble on inferior products. **A-STRIP** removes the build up all the way to the floor, will not harm floor surfaces and rinses completely to insure your finish adheres properly. For best results, finish the floor with **SUPERCO's DURASHINE 29%** solid metal interlock floor finish.
