ACOUSTA Ceiling Tile Whitener is a three in one stain killer that seals and undercoats. Formulated to stop and control common stains on variety of building materials. Can be used on acoustic ceilings, plaster, new wood, painted surfaces, galvanized metal, and rusty metal. Seals fire and water damage.

SEALS AND COVERS THE FOLLOWING:

- Acoustic Ceiling Water Stains
- Smoke or Fire Damage
- Graffiti, Paint, Ball Point, Permanent Marker
- Rusting Nail Heads (Exterior - Interior)
- Redwood and Cedar Stains

WORKS AS:

- Non-Bleeding Primer/Sealer for Sign Painters
- Non-Grain Raising Primer for New Wood
- Base Coat for Wall Paper or Vinyl Wall Coverings
- Base Coat for Galvanized Metal

ACOUSTA dries in 10 minutes at 70° F. Multiple coats may be required to block stubborn stains. Do not paint over mildew (brown or black spots).

PREPARATION:

Clean surface thoroughly. Remove excessive grease, oil, rust scales and other foreign matter. Remove loose rust by scraping or wire brushing.

APPLICATION:

1. Shake can vigorously for approximately 1 minute until mixed thoroughly. shake can occasionally while spraying.
2. Apply at temperatures above 65° F and protect areas not intended for spraying.
3. Hold can upright 12-16 inches from surface to be sprayed and apply even coats.
4. To clean valve and nozzle, turn can upside down and press valve until only gas emerges.

Additional Information

ACOUSTA is Canadian acoustical fiber in an aerosol can. Use **ACOUSTA** to repair damaged ceiling tiles by not only covering the stains but also sealing them into the tile. Repair unsightly gouges and chips in ceiling tiles by color matching them to the rest of the tiles. **ACOUSTA** is available in two matched colors; **White (W)** for newer tiles and **Off-White (OW)** for older tiles. Use **ACOUSTA** for both tile and blown-in ceilings and as a primer/stain killer prior to painting. Use SUPERCO'S **REPAIR-A** to fill-in holes, gouges, and scrapes in all types of acoustical ceilings then color match with **ACOUSTA**.

NOTE: Due to the fibrous nature of **ACOUSTA** it is recommended that the user shake the can **VIGOROUSLY** for at least one minute. Be sure that the steel ball inside the can is loose. Immediately after each use invert can and spray a short burst to clear nozzle for storage.
