AV-90 AUTO VAPE 90 Vapor Deodorizer System

AUTO VAPE 90 is the world's first 90 day vapor based room deodorizer system. This innovative new type of automatic room deodorizer uses the latest Vapor technology to deliver powerful and effective odor control to restrooms, storage closets, common areas, public areas where odors can be a problem. **AUTO VAPE 90** uses no metal cans, no propellents, no isobutane and less packaging giving this product a reduced carbon footprint.

The **AUTO VAPE 90** Fully Programmable Piezo dispenser is State-of-the-Art and can be programmed to trigger every 5, 10 or 15 minutes with user configurable start and stop options. Covers up to 8,000 square feet and one refill is effective for 90 days.

 - #3988 AV-90 Start-up kit* Passion Fruit
 - #3987 AV-90 Auto Dispenser
- *(Kits include dispenser and (2) refills)

Additional Information:

Using the same space age technology as an electronic cigarette, the Auto Vape 90 Deodorizing System with its fully programmable dispenser activates an electric piezo mechanism which heats up the liquid and turns it into a lightweight vapor. When dispensed you see vapor for a few seconds which then carries the powerful long lasting fragrance throughout the room. The lightweight and powerful fragrance stays airborne longer and provides better coverage than solid air fresheners with none of the fall-out residue of aerosol products. Superco Specialty Products has tested the Auto-Vape-90 Deodorizing System and has found that each refill cartridge will last up to 90 days which is 3 times longer than a standard metered aerosol type product. Contact your **SUPERCO** Sales Rep today to see a demonstration of this revolutionary new product.
