CAUTION: May irritate eyes and skin. See side panel for additional precautions and first aid instructions.
.KEEP OUT OF REACH OF CHILDREN

Product # 7468

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

BATTERY ACID CLEANING WIPES & PROTECTOR

BATTERY ACID CLEANING WIPES are easy to use and effective. These wipes will clean corrosion and other contaminants from batteries and terminals. The neutralizing fluid on the wipes does not cause foaming action, and leaves a clean protective barrier on the terminals and contact areas.

DIRECTIONS

Wipe the surface of the battery post, removing deposits. These wipes can also be used to remove corrosion on the connectors and battery trays. The blue wipe will turn pink in the presence of acidic corrosion. Be sure to keep turning and scrubbing the area until the wipe turns back to its original blue color. This will indicate that the corrosion has been neutralized.

DIRECTIONS FOR DISPENSING

1. Remove lid by lifting upward. Remove the foils seal. 2. Pull towel from center of the roll and thread through "X" on the underside of lid. 3. Close lid. Pull towel at a 90° angle. 4. Snap hinged cap back into place to ensure towels stay moist.

CAUTION: May irritate eyes and skin.

INGREDIENTS

Water
Potassium Carbonate
Sodium Carbonate
Thymol Blue

CAS#

7732-18-5
584-08-7
497-19-8
62625-21-2

Additional Information

BATTERY ACID CLEANING WIPES are easy to use and effective. These wipes will clean corrosion and other contaminants from batteries and terminals without the hassle of using messy sprays or gels. **BATTERY ACID CLEANING WIPES** use a unique color indicator formula will turn from blue to pink in presence of acid, then back to blue once the acid is neutralized. The neutralizing fluid on the wipes does not cause foaming action, and leaves a clean protective barrier on the terminals and contact areas. Contact your local **SUPERCO** representative for more information or a demonstration of **BATTERY ACID CLEANING WIPES**.
