 - Time/Badge Readers
- Telephone Card Readers
 - Slot Machines
 - Key Card Readers
- And Many More Applications

Product # 5486

FOR PROFESSIONAL USE ONLY
 CONSULT LABEL AND MSDS BEFORE USING.

CLEAN READ
 CARD READER CLEANER

Superco recommends Cleaning Cards to help keep your Credit Card Readers clean and efficient. Just swipe the Cleaning Cards through your magnetic stripe readers to help eliminate residue build up for positive scanning results. This pre-saturated, disposable head cleaning card is designed to safely and effectively remove all dirt, magnetic oxides and other contaminants from all types of concealed magnetic heads, photo and optic sensors on many different types of reader mechanisms.

Why use Cleaning Cards

Hotel Door Lock and Credit card reader cleaning cards

The importance of regularly cleaning your hotel door locks equals that of vacuuming the carpets. Your guest needs to have easy entry into their room and any hour. With a simple cleaning regimen of once a week the door lock will read the keycards consistently and avoid late night read errors.

The cleaning card is essential to the consistent credit card and debit card reads on your POS Terminal. A credit card has oils and dirt on its surface. With every swipe into your credit card reader these contaminants are transferred into the card reader and onto the magnetic heads. This accumulation of dirt and oils is 80% of the reason why these readers fail. Every time a credit card transaction is manually entered the fees for that transaction are increased by as much as 2%. The increase in fees and the time it takes for a maintenance employee to enter the number manually are essentially eliminated for a fraction of the cost with regular preventive maintenance. The use of cleaning cards will prolong the life of the reader.
