BIODEGRADABLE
DEODORIZES & DEGREASES
ALL COPPER AND
ALUMINUM COILS AND A/C
COMPRESSOR FANS

Product # 5160

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

COIL BRIGHT B Non-Acid Cooling Coil Cleaners is a biodegradable formula for easy cleaning of deposits on coils and air cooled condensers. **COIL BRIGHT B** eliminates the need for high pressure sprayers. This unique product is fast and easy to use. Simply spray **COIL BRIGHT B** evenly over entire area from the air intake side. No rinsing is required. Grease, dirt and lint wash away with condensate and **COIL BRIGHT B** is safe to wash down municipal sewer systems.

DIRECTIONS FOR USE:

1. Turn fan OFF.
2. Remove matted material with brush or fine comb.
3. Spray evenly onto coil, being sure to cover entire coil.

INGREDIENTS

DIETHYLENE GLYCOL MONOETHYL ETHER
ETHYLENE GLYCOL MONOBUTYL ETHER

Additional Information

COIL BRIGHT B Non-Acid Cooling Coil Cleaner is a remarkable product that totally revises common methods of cleaning cooling coils. No longer is it necessary to haul around bulky pressure washing equipment or drag hoses onto the roof or remove smaller A/C units and take them to the shop for cleaning. **COIL BRIGHT B** requires no rinsing. Dirt, grease and lint wash away with the condensate. This effective formula not only cleans the coils but will also degrease and deodorize condensate pans and drain tubes. **COIL BRIGHT B** is biodegradable and is safe to wash down any municipal sewer system. In today's world we have had to learn to conserve and protect our natural resources, water being one of the most important. Using **COIL BRIGHT B** instead of a conventional cleaner can save hundreds possibly thousands of gallons of water per year at an average size facility, and that is only the beginning. Using a regular coil cleaner, the maintenance person will have to wait until the product has done the job, (usually 20-30 minutes per coil), and then thoroughly rinse the coils with water, (another 10-15 minutes per coil). With **COIL BRIGHT B**, you simply spray the product on the coils and turn the unit ON. This process should require no more than a few minutes per coil and does not require any water. In addition to labor and water savings, most utility companies agree that cleaning A/C coils with a product like **COIL BRIGHT B** will allow the unit to run more efficiently, using as much as 25% less electricity. Contact your local **SUPERCO** representative for information on a preventive maintenance program that takes advantage of the benefits of using **COIL BRIGHT B**.
