Product #6602 (Cooling Towel)

Product #6700 (Bandana)

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

COOLING TOWELS & BANDANAS

COOLING TOWELS & BANDANAS

COOLING TOWELS & BANDANAS are a brand new textile technology using advanced hyper-evaporative material. When activated, the towel will drop up to 20 degrees cooler than the outside temperature, which cools down your body temperature. The cooling effect lasts for hours. Water gets absorbed by the multi-fiber weave, which regulates how long it takes the water to evaporate, making the TOWELS & BANDANAS feel cold longer.

TO ACTIVATE: Wet the COOLING TOWEL OR BANDANA and gently wring out the excess water. To reactivate, simply re-shake it. When done with the towel, fold and return to its original package. This keeps the towel compact and ready to use. Do not try to unfold the towel when it is hard, simply dip the towel back into any water source, re-shake and enjoy the COOLING TOWEL OR BANDANA.

#6602 COOLING TOWEL

- 13" X 29.5"
- Lightweight
- Treated with an anti microbial treatment to prevent any bacteria build-up.

#6700 COOLING BANDANA

- Tie Closure
