- Debonds glued fingers & skin.
  - Dissolves glue out of door locks.
- Nonflammable & ozone safe.

Product # 7127

**FOR PROFESSIONAL USE ONLY**  
CONSULT LABEL AND MSDS BEFORE USING.

**DE-BOND**

**Super-Glue Remover**

**DE-BOND** is a remarkable product specifically designed to break to bonding power of all cyanoacrylate type adhesives commonly known as “super-glue”. **DE-BOND** is self-penetrating and fast acting. Ideal for removing excess glue, disassembling parts or freeing glued fingers and skin.

**DIRECTIONS FOR USE:**

Apply **DE-BOND** using the supplied nozzles. Use the pump spray for removing glue from surfaces or parts. Use the needle shaped tip for locks, etc. by cutting 1/32“ from tip and gently squeezing product into glued mechanism. Work mechanism back and forth to break loose and dissolve glue. The thicker the adhesive the longer it will take to remove. Reapply as necessary.

**DE-BOND** Super Glue Remover is an amazing product formulated specifically to dissolve cyanoacrylate type adhesives commonly known as “super glues”. These adhesives are well known for their strength and tenacity and **DE-BOND** may be the only way to separate surfaces, skin or fingers that get bonded together accidentally. Vandalism using instant adhesives in door locks is also becoming more commonplace. At schools and public buildings across the country, maintenance persons are constantly running into the situation of door locks filled with adhesive. **DE-BOND** penetrates the lock cylinder, dissolves the glue and frees the mechanism. This product saves the time and expense of replacing and re-keying locks. **DE-BOND** will dissolve virtually any type of adhesive; double-stick tape, decals, silicone sealers, mastics, construction glue and many other high strength adhesives. **DE-BOND** is shipped with two types of applicator tops. For locks and other small spaces a pinpoint top that can be trimmed to size makes injecting the product into the mechanism quick and easy. A pump spray top is also supplied for applying to a wider area. This applicator is handy for cleaning up glue residue from hard surfaces. **DE-BOND** is a versatile product that no maintenance department should be without.
