

ENVIRONMENTALLY FRIENDLY

EXTRA

Earth Friendly Parts Washing Solvent

EXTRA is the latest breakthrough in environmentally safe and user friendly solvent cleaners. This remarkable product was designed to give the industrial user a safer way to clean grease, tar, oil and grime from a wide variety of parts and equipment. **EXTRA** is non-corrosive and non-conductive with a dielectric strength of up to 25,000 volts. This makes **EXTRA** the ideal choice for solvent tanks and recirculating parts washers and is easier to dispose of than other petroleum distillate based parts cleaners. Our concentrated formula features the grease dissolving power of d-Limonene and contains no chlorinated or fluorinated solvents making **EXTRA** the ideal product to use in environmentally conscious situations or where highly toxic products are not suitable.

DIRECTIONS FOR USE:

General Cleaning: Apply **EXTRA** with sprayer and allow product to saturate soil. Scrape or brush to remove soil and wipe clean.

Recirculating Parts Washers: Use a metal tank with a tight fitting cover to retard evaporation. Use a water trap. Fill solvent reservoir with water to a level 2 to 3 inches below pump pick up. Fill remainder of tank with parts washing solvent. Dirt and sediment are trapped in the water layer at the bottom of the tank and should be drained periodically. This will extend the life of the solvent. Immerse parts in **EXTRA**, allow to soak clean. Cleaned parts can be air dried, wiped or blown dry with compressed air.

CAUTION:

Not for use on computers, automated process equipment, data processing equipment, etc. Some sensitive plastics may be softened by contact with this product. Test before using.

EXTRA

Earth Friendly Parts Washing Solvent

- Quickly dissolves grease, grime, ink and other soils.
- Non-conductive dielectric strength of 25,000 volts.
- Safe on all metals, most plastics & rubber compounds.
- Non-corrosive and contains no chlorinated solvents.

Product # 5187

**FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.**

INGREDIENTS

d-LIMONENE
ISOPARAFINIC HYDROCARBON
LOW ODOR PETROLEUM DISTILLATES

EXTRA is the latest in citrus solvent cleaners. This highly refined formula dissolves and emulsifies grease, grime, tar, oil, etc. Designed for use in all types of parts washing equipment. **EXTRA** is also nonconductive up to an impressive 25,000 volts, making it the ideal product for cleaning industrial equipment. Safe on all metals, most plastics and rubber, **EXTRA** is an environmentally safe and user friendly option to conventional parts washing solvents. Many of these other solvents contain toxic and very hazardous ingredients, but not **EXTRA**. **EXTRA** is the most advanced form of natural cleaning agents available. For more information and a demonstration of **EXTRA**, contact your local **SUPERCO** representative.
