SPECIALTY PRODUCTS

FREEZE-IT-UP

FREEZING ACTION
PENETRATING LUBRICANT

- Freezing action breaks open rust barrier
- Advanced formula penetrating lubricant
- Rust eating technology dissolves rust
- Nonconductive to 33,000 Volts
- Ultra low VOC - No Chlorinated Solvents
- No ozone depleters

USED BY:

- Factories • Fleet Maintenance Centers
- Muffler Shops • Marine Repair
- City/County/State Maintenance Facilities
- Virtually anywhere assembly / disassembly is performed

PRODUCT # 1171

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

FREEZE-IT-UP

FREEZING ACTION PENETRATING LUBRICANT

FREEZE-IT-UP is the latest breakthrough in penetrating lubricant technology. **FREEZE-IT-UP** is a powerful combination of rapid freezing action coupled with an advanced “rust-eating” formula that easily releases seized or rusted parts. **FREEZE-IT-UP’s** rapid freezing action actually shrinks parts and quickly breaks open micro-fine fissures which allow the lubricant to easily penetrate even the toughest rust.

DIRECTIONS:

NOTE: Sudden temperature drop can result in “thermal shock” which may cause crazing of some plastics and paint. While appropriate for use on many plastics and painted surfaces, always test in an inconspicuous area before general use. Accumulated vapors from this product may reach ignition conditions in confined spaces. Always use with adequate ventilation. Shake well before using. Insert extension tube provided. Spray liberally for 5 - 10 seconds on surface to be lubricated. Target the bolt, nut or part and limit the amount of contact to the surrounding area. Wait 30 seconds to allow temperature reduction and to facilitate penetration. Loosen or remove part. Repeat if necessary.
