

GERMICIDAL

Foaming Germicidal Cleaner

- **CLEANER-DISINFECTANT-DEODORIZER FUNGICIDE VIRUCIDE*-MILDEWSTAT (on hard inanimate surfaces)**
- ***DISINFECTS HERPES SIMPLEX VIRUS TYPE 1 & 2, INFLUENZA A2 (Hong Kong) VIRUS & HIV-1 (AIDS Virus)**
- **READY TO USE • FOR HOSPITAL & INSTITUTIONAL USE**

Product: # 1085 Aerosol

Product: # 3001 Quarts

Product: # 5146GL Bulk

**FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.**

AUTHORIZED BY USDA FOR USE IN FEDERALLY INSPECTED MEAT AND POULTRY PLANTS

Additional Directions

Special instructions for cleaning and decontamination against HIV-1 (AIDS Virus) of surfaces/objects previously soiled with blood/body fluids. Disposable gloves should be worn when cleaning blood, body fluids or contaminated items. Hands should be washed immediately and thoroughly after gloves are removed, or if hands are contaminated with blood or body fluids. Masks and protective eyewear or face shields should be worn during cleaning procedures involving blood or body fluids. Gowns or aprons should be worn during cleaning procedures for protection against splashes of blood or other body fluids. Blood and other body fluids must be thoroughly cleaned from surfaces and objects with a suitable detergent before application of the disinfectant. Leave surface wet for 10 minutes. After cleaning is complete, follow disinfection directions described previously. Contaminated waste and blood and other body fluids should be autoclaved and disposed according to local regulations for infectious waste disposal.

ENVIRONMENTALLY FRIENDLY

GERMICIDAL is designed for general cleaning and disinfecting in nursing homes, hospitals, institutions, offices, schools, motels and hotels. This product is formulated to disinfect inanimate hard surfaces such as walls, sink tops, tables, chairs, telephones, door knobs, light switches, shower stalls, hampers, cabinets and bed springs. **GERMICIDAL** is also recommended to be used on **Air Conditioning coils**. Spray product evenly over entire coil from the air intake side. No rinsing required. Allow product to penetrate and remain wet for 10 minutes. When used as directed, this product is effective against Staphylococcus aureus, Salmonella choleraesuis and Pseudomonas aeruginosa, thus meeting requirements for hospital use. Efficacy tests have demonstrated that this product is an effective one-step cleaner/disinfectant in the presence of organic soil (5% blood serum). In addition, this product deodorizes those areas which generally are hard to keep smelling fresh such as garbage storage areas, empty garbage cans and bins, basements, restrooms and other areas which are prone to odors caused by microorganisms

DIRECTIONS FOR USE:

Disinfection, Cleaning and Deodorizing: Pre-clean all surfaces prior to disinfection. On hard non-porous surfaces such as bathroom tiles, fixtures, shower stalls, walls, sinks and bathtubs proceed as indicated below.

1. Hold container 6 to 8 inches from surface to be treated.
2. Spray area until it is covered with the solution. Allow the product to penetrate and remain wet for 10 minutes. No scrubbing necessary.
3. Wipe off with a clean cloth, mop or sponge.

GERMICIDAL will not leave grit or soap scum.

Virucidal: Against Herpes Simplex Type 1 virus, Herpes Simplex Type 2 (genital) virus, Influenza A2 (Hong Kong) virus and HIV-1 (AIDS Virus).

Fungicidal: Against Pathogenic fungi (T. mentagrophytes) when used as directed on hard surfaces found in the bathroom, shower stall and locker room or other clean, hard non-porous surfaces commonly contacted by bare feet.

Mildewstat: To control and prevent mold and mildew on hard non-porous surfaces (such as floors, walls and table tops), spray the surface to be treated, making sure to wet completely. Let air dry. Repeat application at weekly intervals or when mildew growth reappears.

Kills HIV-1 on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).
