

GLEAM-WB

Water-Based Stainless Steel and Metal Polish

CLEANS, POLISHES & REVITALIZES ALL METAL SURFACES

EFFECTIVE ON STAINLESS STEEL, ALUMINUM, ZINC, IRON, MILD STEEL, BRASS, COPPER & SILVER

Product # 1054WB	Aerosol
Product # 3075	Quarts
Product # 507541WB	Gallons
Product # 5075WB	Bulk

**FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.**

GLEAM-WB WATER-BASED Stainless Steel Cleaner & Polish

GLEAM-WB is the latest innovation for brightening and protecting metal. This unique product provides a water resistant surface which is non-greasy and non-yellowing. **GLEAM-WB** has a refreshing scent and contains no acids or abrasives. **GLEAM-WB** will not powder or create an ugly wax build-up. **GLEAM-WB** gives long lasting protection to stainless steel and many other hard surfaces such as porcelain, Formica, marble, enamel, wood and rubber. **GLEAM-WB** will quickly remove surface dirt and unsightly stains while leaving a dry, lustrous finish that resists fingerprints, water marks and grease stains.

DIRECTIONS FOR USE:

Dry and thoroughly clean stainless steel or other surface about to be polished, with an all purpose cleaner. Spray or wipe **GLEAM-WB** onto surface evenly and lightly then wipe dry using a clean cloth. **GLEAM-WB** needs no hard rubbing or polishing.

Additional Information

GLEAM-WB Stainless Steel and Metal Polish is an exceptional product. Stainless steel polishes are common products and most of the people that use them on a regular basis will tell you that they are all pretty similar. Most smell like paint thinner or some kind of solvent and they will generally irritate office workers, tenants and guests, basically the people you are hoping to please by doing the cleaning in the first place. **GLEAM-WB** is unique because of the pleasant fragrance left behind after treatment. Switching from a conventional stainless steel polish to **GLEAM-WB** will surely bring compliments from not only from the general public but from the maintenance staff as well. **GLEAM-WB** is a water-based formula ideal for food preparation areas where oil-based formulas are not allowed to be used. **GLEAM-WB** is excellent for use on a number of surfaces found at virtually all facilities. Use on porcelain, chrome, Formica, ceramic tile, brass, copper, aluminum to bring an attractive shine as well as provide a protective barrier against rust, corrosion and oxidation. Many metal surfaces like brass and copper start oxidizing and tarnishing immediately after being polished with a paste type polish. This happens because paste or abrasive cleaners leave the metal without any protection so that moisture from the air and oil from fingerprints discolor the surface quickly. Use **GLEAM-WB** on these frequently polished areas to remove fingerprints and provide a protective barrier and you will not have to polish them as often. **GLEAM-WB** can be a big labor saver at restaurants, night clubs, country clubs, hotels, office buildings and theaters or anywhere with metal surfaces to maintain.
