GOBBLE PLUS

- Drain and Sewer Treatment and Deodorizer
- Natural Citrus Base • Non-Acid
 - Non-Caustic • Non-Corrosive
 - Environmentally Safe • Non-Chlorinated

GOBBLE PLUS is a remarkable blend of grease cutters. Use regularly to reduce the build-up of grease, soap scum, slime, etc. Controls odor in garbage disposals, around dumpsters, sumps, sewage treatment plants, restaurants, trash compactors and drains. Will not affect bacterial action. **GOBBLE PLUS** instantly begins dissolving even the toughest grease build-up. When used as a cleaner, **GOBBLE PLUS** destroys even the worst grime while deodorizing at the same time. Dump the dirty mop water down the drain and treat your plumbing at the same time.

DIRECTIONS FOR USE:

DECLOGGING: Use weekly to keep drains free-flowing. Use on drinking fountains, ice bins, condensate pans, dishwasher drains, etc., to control slime & algae growth in pan or drain. **PREVENTATIVE MAINTENANCE:** 8 oz. weekly to all drain openings and let stand for 10 minutes the flush with warm water. For grease traps under 20 cubic feet (150 gallons equals 20 cubic feet), add 5 oz. daily. For larger traps or clogged drains, pour 12 to 16 ounces into drain.

Additional Information

GOBBLE PLUS Quarts & Bulk Citrus D-limonine Drain and Sewer Treatment are a unique alternative to the many drain maintenance products on the market today. This revolutionary formula is non-caustic, non-acid and environmentally safe and is safe on all types of plumbing systems including garbage disposals. **GOBBLE PLUS** is non-corrosive and can be poured into drains, grease traps or garbage disposals and left for any length of time without adverse effects. The natural citrus solvent that is the base ingredient in **GOBBLE PLUS** starts working immediately dissolving the grease and scum that causes most blockages. **GOBBLE PLUS** will not affect bacterial action or reduce the effectiveness of enzyme treatments. However, many dish washing chemicals common to restaurants and kitchens will neutralize bacteria and enzyme drain maintainers so use **GOBBLE PLUS** where these products have failed. Grease traps, sumps, lift stations and septic tanks are all good candidates for a Knight Watch Drain Maintenance System from **SUPERCO**. This fully automatic injection system dispenses a measured amount of **GOBBLE PLUS** each night to insure the best preventive maintenance possible. Consult your **SUPERCO** representative for more information and installation.
