**GUARD**

**Carpet & Upholstery Stain Barrier**

**GUARD** Stain Barrier protects new or freshly cleaned fabrics by putting a barrier between your fabric and grease or water so spills blot up easily. Maintains the appearance and beauty of upholstery, carpets or fabrics. Makes future cleaning easier and extends the life of fibers. Will not alter the texture of fine and delicate fabrics.

**DIRECTIONS FOR USE:**

To apply on damp carpet, use full strength.  
To apply on dry carpet, use mix with 2-8 parts water.  
For best results, apply on new or just cleaned, damp or dry carpets. Spray evenly, just enough to dampen the surface, do not saturate or over spray. Allow to dry six hours or overnight for protection to develop. Test on an inconspicuous area for color fastness.

**CARE OF TREATED CARPETS:**

Never rub. Always blot away spills with an absorbent cloth or sponge. Wipe away remaining residue with a damp cloth. Use **SUPERCO's ERASE** or equivalent cleaner to remove oily stains, then reapply **GUARD**.

**Additional Information**

**GUARD** Stain Barrier is the best product you can get to ensure the life and beauty of your carpet and upholstery. Many good carpets and fabrics are made today with special stain guards or protective coatings to help keep them from staining. Buying carpet with one of these treatments can double the cost of the carpet. What the manufacturers of the carpet do not tell the buyers is that after routine cleaning, the stain protection washes out with the dirt. **GUARD** is a superior stain barrier designed to protect carpet and upholstery from both oil based and water based soils. Use **GUARD** after each cleaning of all carpets and fabrics and dirt, grease and other soils will not hold on to fabric fibers. After being treated with **GUARD** future cleaning will be up to 10 times easier and therefore quite a bit faster than cleaning would be without the stain barrier. Consult your local **SUPERCO** representative for more information on our complete line of high performance floor care products.
