

The YES Company!!

GUARDIAN

ANTI-GRAFFITI COATING

- CONTAINS ANTI-STICK PROPERTIES TO PROTECT ANY SURFACE
- 100% CLEAR PERMANENT COATING
- ONE-STEP PROCESS

APPLY TO ANY SURFACE OR SUBSTRATE

- NON-SACRIFICIAL, NON-YELLOWING, CLEAR & QUICK DRYING
- CAN BE APPLIED TO VERTICAL OR HORIZONTAL SURFACES

USE AT:
SCHOOLS, CITY, COUNTY, STATE & FEDERAL BUILDINGS, ROAD & STREET SIGNS, PARTITIONS, TRAINS, BUSES, PLAYGROUND EQUIPMENT, NEWSPAPER COMPANIES AND ANYWHERE GRAFFITI IS FOUND

Product # 1219

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

GUARDIAN

ANTI-GRAFFITI COATING

GUARDIAN is a patented, nanotechnological, permanent non-stick coating. **GUARDIAN** incorporates a unique nano-polymer with an extremely high slip coefficient that both penetrates the structure and builds a non-stick film. **GUARDIAN** is single component, water-clear, UV stable, heat stable and has extreme chemical resistance. **GUARDIAN** forms both a mechanical and chemical bond to organic and inorganic substrates making it universal in its application. Use on metal, wood, concrete, brick, etc. **GUARDIAN** will darken porous surfaces. Test an inconspicuous area before proceeding with entire application.

DIRECTIONS FOR USE:

APPLICATION:

1. Shake can well before application.
2. Apply your first application as a flood coat and apply liberally.
3. Allow the first coat of **GUARDIAN** to cure approximately 4 hours in ambient conditions.
4. A single coat may be sufficient but a second or third coat can be applied depending on your application, substrate or requirements. One can of **GUARDIAN** will cover approximately 30 square feet depending on the substrate.

Graffiti Removal:

1. Remove graffiti as soon as possible after surface has been vandalized.
2. Success has been achieved by using:
 - One Step, Rite-Off, or Soy Graffiti Removal towels
 - Water and Superco's Hurricane at no more than 20%
 - Pressure washing under 1000 psi. Pressure over 1000 psi may threaten the integrity of the coating.
 - Any light alkaline, citrus, acetone cleaner. Make sure to flush the coating with water after chemical cleaning to ensure the integrity of the coating.

Always test chemical cleaners before moving to full application.

NOTE: For signs that are pre-treated with reflective material, you will have to reapply **GUARDIAN** after graffiti removal.
