HURRICANE

Cleaner Degreaser with Bi-Phase Emulsification

- ENVIRONMENTALLY SAFE - BIODEGRADABLE
- POWERFUL WATER SOLUBLE SOLVENT
- FOR REMOVAL OF OIL, GREASE, GRIME, CARBON, SOOT AND OTHER SOILS WITHOUT FIRE HAZARD
- EXCELLENT FOR USE IN KITCHENS, PRINTING, SCHOOLS & TRANSPORTATION INDUSTRIES.

Product # 5024 Bulk
Product # 3028 RTU-Q

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

HURRICANE is a powerful, concentrated, New-Age cleaner. **HURRICANE** is effective for cleaning the toughest soils. Grease, grime, carbon, oil, soap scum, soot, you name it, are no match for **HURRICANE**. Safe on any surfaces, **HURRICANE** is mild to use yet powerful enough to remove stubborn soils, and will not etch glass. **HURRICANE** actually turns grease and oil into a biodegradable soap so you do less work! **HURRICANE** is super-concentrated and can be diluted up to 100:1. Follow our dilution chart below or simply mix **HURRICANE** to your personal taste and blast away excess scrubbing!

DIRECTIONS FOR USE:

- 1 part **HURRICANE** to 50+ parts water: For use in steam or pressure washers. For cleaning lightly soiled or waxed floors.
- 1 part **HURRICANE** to 10-25 parts water: For use as an all-purpose cleaner, on floors, walls, desks, countertops, stainless steel, RV equipment, plastic, vinyl, etc.
- 1 part **HURRICANE** to 4-10 parts water: For removing grease and stubborn soils. Use on wheels, white walls, grills, fans, motors, refrigerators, concrete, tile, restaurant equipment, etc.
- 1 part **HURRICANE** to 2-4 parts water: For cleaning brick, ovens, flues, engines, trucks, buses, crude oil, tar, carbon, AC coils, asphalt parking areas, soap scum, dumpsters, trash chutes, etc.

Authorized by USDA for use in federally inspected meat and poultry plants.

Additional Information

HURRICANE Bi-Phase Cleaner Degreaser is a breakthrough in chemical technology. This water dilutable safety solvent actually turns grease and oil into a biodegradable soap, a process called saponification. **HURRICANE** is self-cleaning and non-polluting making it the ideal product for environmentally concerned, safety conscious buyers. **HURRICANE** is formulated with added ingredients to enhance its performance. We added rust inhibitors to protect any ferrous surfaces that may be cleaned with **HURRICANE** from flash rusting. Special surfactants have been added to increase the cleaning power 10 times and boost performance at a wide range of mix ratios. Compared to most cleaner/degreaser products, **HURRICANE** is milder in pH and will meet the needs of any safety department. **HURRICANE** is versatile, this heavy-duty, highly concentrated formula will remove grease, oil, and carbon deposits from equipment, machinery, vehicles, concrete, asphalt, etc., found at oil refineries, service facilities, manufacturing and processing plants, shipyards, commercial buildings, etc. **HURRICANE** is unequalled in its ability to save labor by speeding up whatever cleaning task is at hand while at the same time allowing the user to take advantage of mix ratios that reduce the end-use cost to pennies a bottle. Use **HURRICANE** in conjunction with **SUPERCO's Mixing Station System** to maximize economy while providing easy employee access to materials. Ask your **SUPERCO** representative for details on how to get one of these systems installed at your business.
