

KLEAN-UP

HEAVY DUTY CITRUS BASED
DEGREASER & OIL STAIN REMOVER

REMOVES TIRE MARKS

DISSOLVES GLUE & GUM

REMOVES OLD & NEW
GREASE FROM CONCRETE
FLOORS & DRIVEWAYS
INSTANTLY

Product #505841 Gallons
Product #5058 Bulk

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

KLEAN-UP will remove oil stains, grease, and tire marks from new and old sealed or unsealed concrete floors. **KLEAN-UP** also may be used to remove curing material and other matter including gum, ink or glue from any non plastic surface.

DIRECTIONS FOR USE:

Unsealed Concrete Floors: For Removal of Black Rubber Marks, Heavy Deposits of Grease and Oil on Concrete Surfaces apply a liberal amount of **KLEAN-UP** on problem area. Allow to stand wet for 60 to 90 seconds. Agitate solution to loosen heavy deposits. Flush off loosened material with hose or liberal application of water. Squeegee dirty solution into container or pickup with wet vacuum pickup.

Sealed Concrete Floors: Application of **KLEAN-UP**, as is, to a small test area is recommended prior to large scale cleaning applications because loss of gloss, softening or removal of seal may take place due to high solvency. Where adverse effect is observed to a seal film, solvency can be reduced by pre-diluting 1 part of **KLEAN-UP** with approximately 1 part of water before application to floor. Diluted material should then be applied to floor by mop with special attention given to agitating diluted solution in the mop bucket with mop at 1 minute intervals during application since diluted solution will slowly separate (solvent rises to surface of solution).

INGREDIENTS

D-LIMONENE
AROMATIC HYDROCARBONS
DIPROPYLENE GLYCOL MONOMETHYL ETHER

CAS NUMBER

5989-27-5
64742-945
34590-94-8

Additional Information

KLEAN-UP Grease and Oil Stain Remover is a powerful blend of solvents that cleans oil stained concrete surfaces faster and more thoroughly than any other cleaner. This unique formula dissolves years of caked-on grease on contact and lifts the stain out of the concrete to leave the surface looking like new again. Equally effective on many types of brick, flagstone and aggregate, **KLEAN-UP** removes black tire marks and dissolves gum and glue. No need to rent or buy expensive pressure washers because **KLEAN-UP** is so powerful you simply spray on and hose off or mop up unsightly oil stains. Many acid type concrete cleaners will bleach out the color of the concrete or change the surface texture but not **KLEAN-UP**. **KLEAN-UP** penetrates quickly and emulsifies the grease, oil, tire marks, gum and glue in seconds and lifts them to the surface where they can be rinsed or mopped away easily. Many caustic detergents and powdered cleaners leave messy white residues even after rinsing. **KLEAN-UP** leaves sidewalks, patios, driveways, loading docks, warehouse & garage floors looking great with a minimum of effort. This product is so fast and easy to use that one person can clean an area in one day that would take two or three people a week using conventional methods. **KLEAN-UP** is a "must see" demonstration guaranteed to impress even the most skeptical buyer. Contact your local **SUPERCO** representative for a convenient appointment.
