## LUX

### Regular and Antiseptic Hand Soap

**LUX** Hand Soap is a deluxe formula designed to make hands feel and smell terrific. Added skin conditioners and emollients give **LUX** a rich, smooth texture. Lightly scented, this pleasant product leaves your hands fresh and clean. Available in regular or antiseptic formulas, **LUX** is ideal for use in hospitals, restaurants, fitness centers, schools, public restrooms, clubhouses, recreation centers, RV's, cruise ships, etc. The unique design of both the soap container and the dispenser provide measured amounts of soap without dripping all over the fixtures.

**LUX ANTISEPTIC:** **LUX** Antiseptic antibacterial lotion soap is scientifically formulated with **PCMX**. Laboratory tests have proven that **PCMX** is effective against a wide variety of disease causing bacteria and germs.

### DIRECTIONS FOR USE:

**To mount the soap dispenser:** Thoroughly clean and dry the surface where the dispenser is to be mounted. Remove the backing from the adhesive strip and firmly press against wall or partition. Secure with supplied screws for extra security if desired.

**To refill dispenser:** Gently slide the nipple of the soap bottle into the marked retaining clip and place the bottle into the dispenser and close the front cover to secure.

**To dispense soap:** Each push on the front of the dispenser will release a measured amount of soap into the palm of the hand. When not in use, soap will not drip out of the dispenser and create a mess or cause excess waste.
