## MELT AWAY

### Liquid Snow and Ice Melt

**MELT AWAY** is a ready-to-use liquid snow and ice melt is environmentally safe, biodegradable, non-corrosive and safe on all surfaces. **MELT AWAY** is safe to use around shrubs and trees, and melts to -20°F. **MELT AWAY** creates a non-stick barrier and is used as a anti-snow/ice agent to reduce re-accumulation. **MELT AWAY** contains Magnesium Chloride(MgC<sub>12</sub>) and natural co-products of corn and grain condensed solubles. **MELT AWAY** has unlimited shelf life and one gallon covers up to 1000 sq. feet.

#### DIRECTIONS:

Apply by using Sprayer that can deliver a 1/4" stream or mist. DO NOT DILUTE WITH WATER. Apply to driveways, walkways, stairs, decking, ramps, roof and eaves. For trees and shrubs mix with 50% water. Plan your application from the farthest point to minimize tracking through the solution. Store in a cool dry place. One gal. Covers approximately 1000 sq. ft. Equal to 50 lbs. of rock salt or pellets.

**As an AntiSnow Solution:** MELT AWAY 2 hrs, before an expected snow or ice storm. Mist the entire surface with a coating to reduce the accumulation of snow or ice.

**As a Deice Solution:** Apply MELT AWAY in a 1/4" stream to packed ice or snow. Allow between 60-90 minutes to maximize effectiveness.

**For Thick Ice Application:** Use in conjunction with salt and sand to speed the process.

## Additional Information

### Frequently Asked Questions

**What is Melt Away?** MELT AWAY is an all natural environmentally safe co-product of corn, grain or agricultural processing sometimes containing distillers condensed solubles that is added to a base of Magnesium Chloride (MgC<sub>12</sub>). MELT AWAY is non-toxic, water soluble, non-flammable, biodegradable and less corrosive than water.

**When should I use Melt Away?** MELT AWAY can be used as an anti-snow agent prior to a snow storm or ice storm. MELT AWAY is also an excellent deicer which can be applied directly to an ice or snow pack. Are there any cautions to using Melt Away? Yes, do not apply MELT AWAY when the temperature is above 35 degrees because it can create a slippery surface.

**How does Melt Away Work?** MELT AWAY sinks to the surface level, melting as it goes down, and spreads out after reaching the surface breaking the bond between the snow or ice and the pavement for an easy and complete cleanup.

**Does Melt Away have a shelf life?** No. Just shake the capped container to dislodge any sediments that may have settled and MELT AWAY is read to use again.
