N-Propyl Acetate
 Xylenes (Dimethyl Benzenes)
 Petroleum Naptha (VM&P)

CAS #

109-60-4
 1330-20-7
 64742-89-8

OMNI-STICK One Step Adhesive

OMNI-STICK clear adhesive / sealant works great on almost anything. Use on:

- Ceramics
- Concrete
- Cork
- Fiberglass
- Glass
- Leather
- Metal
- Plastics
- Rubber
- Paper
- Porcelain
- Textiles
- Wood

DIRECTIONS FOR USE:

1. Remove cap.
2. Utilize cap to pierce top of tube by turning cap over and pressing down.
3. Screw white snip tip onto the neck of the tube. Snip end for desired flow. (The further down the tip, the wider the flow.)
4. Squeeze tube from bottom up with gentle pressure. **NOTE: If glue does not flow, clean opening.**
5. Be sure surfaces are clean, dry and free of oil or grease.
6. Apply to one surface only. Slick surfaces may be roughened with sandpaper before gluing.
7. Press surfaces together. If a quick bond of 40 seconds is needed, then pull back about 1/2" and repress. Repeat several times. Supports light loads in 10-15 minutes; allow 24 hours for heavier loads Fully cures in 24 hours.
8. Clean nozzle thoroughly BEFORE replacing cap.
9. Test questionable surfaces before use. Can be used on vinyl surfaces when etched.
10. Nail polish remover or paint thinner may be used as a cleaner
