PATCH-IT PLASTIC
Epoxy Plastic Repair Kit

- HARDENS IN MINUTES
- BONDS INSTANTLY WITH SUPERIOR STRENGTH
 - EASY TO USE AND MISTAKE PROOF
 - USE FOR INTERIOR OR EXTERIOR

Product # 7111P

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

PATCH-IT PLASTIC

Epoxy Plastic Repair Kit

- REPAIRS ANYTHING MADE OF ABS, CPVC AND PVC Plastic.
- REPAIRS PVC FURNITURE, AUTOMOTIVE TRIM, APPLIANCE PARTS, VINYL SIDING, PLASTIC DOWNSPOUTS AND GUTTERS, SEALS LEAKS IN PVC AND ABS PLUMBING PIPES.
- CONTAINS NO SOLVENTS - HAS NO ODOR - WILL NOT SHRINK, CRACK, ROT OR PULL AWAY.
- HAS 20 MINUTE WORKLIFE & HARDENS IN 35-40 MINUTES.

DIRECTIONS FOR USE:

For best results, clean and roughen bond area prior to application. Cut or twist off desired amount of **PATCH-IT PLASTIC** and knead it to a uniform color. Apply to surface to be repaired (within 2 minutes of mixing). The mixed epoxy does not exhibit high bond strength at this point but appears to be merely lying on the surface. Force into any cracks or holes to be filled and strike off excess material. For a smooth appearance of the cured compound, hand rub with water or a damp cloth prior to hardening. Remove excess material before hardening begins. Within 35-40 minutes the epoxy will harden and form a tenacious bond. After 2-3 hours, the system can be put back into service

Additional Information

PATCH-IT PLASTIC is the most convenient and useful plastic repair material ever developed. This product is a fast setting polymer compound that enables permanent repairs to all major plastic types except polyolefins (polyethylene/polypropylene). It also bonds to metal, wood, glass, and masonry. Each stick contains pre-measured portions of activator and base throughout - no measuring or mixing tools are necessary. As the epoxy is mixed, the two contrasting colors blend into one color to indicate complete mixing. **PATCH-IT PLASTIC** epoxy contains a fading blue dye and becomes white after mixing. The consistency of **PATCH-IT PLASTIC** (like modeling clay) eliminates drips and runs, facilitates adhesion to any substrate, and allows the material to be shaped and formed as needed before curing begins. Once cured, it can be drilled, sawed, carved, sanded or painted. **PATCH-IT PLASTIC** is suitable for interior or exterior use, is resistant to water, chemicals, and temperature extremes. Contact your local **SUPERCO** representative for a demonstration of the effectiveness and versatility of **PATCH-IT PLASTIC**.
