PATCH-IT COPPER

Reinforced Epoxy Putty

- BONDS TO DAMP, WET AND SLOW LEAKING SURFACES.
- REPAIRS LEAKS IN PIPES, ELBOWS, JOINTS, SLEEVES, TRAPS & DRAINS.
- SEALS PINHOLE LEAKS, FREEZE BREAKS & LEAKING HOT WATER LINES.
- WILL NOT SHRINK OR PULL AWAY - CAN BE DRILLED, TAPPED, FILED OR MACHINED.

DIRECTIONS FOR USE:

For best results, clean and roughen bond area prior to application. Twist off desired amount of **PATCH-IT COPPER** and knead it to a uniform color. Apply to surface to be repaired within 2 minutes of mixing. The mixed epoxy does not exhibit high bond strength at this point but appears to be merely lying on the surface. Force into any cracks or holes to be filled and strike off excess material. When applying to a damp, wet or leaking area, work the material forcefully into the surface and apply pressure until adhesion begins to take effect. For a smooth appearance of the cured compound, hand rub with water or a damp cloth prior to hardening. Remove excess material before hardening begins. After 5-10 minutes the epoxy will harden like metal and form a tenacious bond. After just 60 minutes, the system can be put back into service.

Additional Information

PATCH-IT COPPER is the fastest and most effective way to repair copper plumbing parts. This product combines super adhesion, high strength and hardness, water and chemical resistance with ultra fast drying & curing. **PATCH-IT COPPER** can be used on all copper plumbing parts, pipes, joints, traps and drains. The speed of this product makes sealing leaks and breaks fast and easy. **PATCH-IT COPPER** can be drilled, tapped, filed or machined and will not shrink or pull away. **PATCH-IT COPPER** is a two part epoxy putty that is uniquely packaged for ease of use. Simply twist off the desired amount of product then knead the two colored material into a uniform color. No measuring is required and there is no chance for making a mistake. **PATCH-IT COPPER** bonds and cures in about 5-10 minutes and plumbing systems can be put back into service in as little as 60 minutes. Using **PATCH-IT COPPER's** fast method of repair can save labor by drastically reducing repair time not to mention the expense saved by not having to replace pipes and parts. Minimizing system downtime avoids the inconvenience and difficulty normally related with this kind of repair work. The superior strength and adhesion of **PATCH-IT COPPER** provides for a long lasting and durable repair. Contact your local **SUPERCO** representative for a demonstration of the effectiveness of **PATCH-IT COPPER**.
