RED-OUT Red Stain and Food Dye remover is a breakthrough in chemical technology. This advanced formula can remove red stains, food dyes, shoe polish and latex paint from carpets that would otherwise have to be replaced.

DIRECTIONS FOR USE:

1. Check stain for residue from inferior cleaners. If present, rinse completely before starting. Blot dry if needed.
2. Apply **RED-OUT** directly from bottle to stained area. Allow to soak for a few seconds before starting. Next lay a moist 100% cotton white towel or wash cloth over stained area.

3. Fill your normal household steam iron with plain water. Set iron at lowest heat setting that will produce steam. NOTE: Higher heat does not speed up the process, it slows it down and sets the stain.
4. Set the preheated iron on top of the towel directly over the stained area. Do not apply pressure. Use the weight of the iron only.
5. Allow iron to set on the towel until it starts to boil around edges. This usually takes approximately 20-40 seconds.
6. When boiling starts apply pressure to handle of iron and hold firmly on towel for about 10 seconds, then lift iron and towel, check for transfer, shift iron to clean moist area on towel and repeat if necessary.

7. Repeat steps 4-5-6 until stain is gone. When treating a questionable surface, pre-test in an inconspicuous area first.

Additional Information

RED-OUT Kool Aid® and Food Dye Remover can clean carpets you that thought you would need to replace due to stubborn red stains. Spots from wine, cough syrup, fruit drinks, soft drinks, shoe polish and latex paint can be impossible to remove. Generally, carpets stained with these substances have to be replaced or dyed a darker color. Both of these courses of action are costly and time consuming. **RED-OUT** can save these doomed carpets 99 times out of 100. **RED-OUT** is a breakthrough in chemical cleaners and utilizes a heat-transfer process that is quick and easy. No special skills, tools or training is needed to remove stains even after months or years in the carpet. Outside cleaning contractors will normally charge up to \$60. per spot to remove these kinds of stains using this method. Each bottle of **RED-OUT** will remove dozens of spots and nothing could be more economical in these situations. **RED-OUT** is compatible with all types of carpet cleaners so you can remove red stains, food dyes and latex paints then shampoo the entire carpet. Seeing is believing with a miracle product like **RED-OUT** so contact your local **SUPERCO** representative for an eye-opening demonstration. Before you needlessly replace another stained carpet or pay ridiculous fees for specialized cleaning use **RED-OUT**.
