**RESTROOM RESCUE**

Heavy Duty Clinging Restroom Cleaner  
NON-ACID • NON-TOXIC • NON-CAUSTIC • NON-FLAMMABLE • BIODEGRADABLE

**RESTROOM RESCUE** is a clinging multi-surface restroom cleaning product designed for professional daily use. This product is specially formulated to remove soap scum and hard water stains from virtually all restroom surfaces. **RESTROOM RESCUE** has a thick consistency that clings to vertical surfaces and under toilet bowl rims. The pleasant fragrance deodorizes while it cleans. The multiple cleaning agents combine to give the extra cleaning power required for commercial applications. Can be diluted with water for economical daily use or used full strength for cleaning fixtures that were previously considered beyond repair.

**DIRECTIONS FOR USE:**

**For Toilets & Urinals:** Squirt **RESTROOM RESCUE** full strength on inside of bowl surface, swab around entire bowl including under the rim with a swab mop. Wipe around the fixture exterior and seat. The bowl cleaner clings to the bowl surface. Cleaning action continues as **RESTROOM RESCUE** remains in contact with the bowl. After 5 minutes, flush the toilet. Give the bowl a quick mopping with a swab mop to remove any excess. Wipe the exterior with a sponge or rag. Clean toilet tanks as may be required. Allow 5 minutes for the bowl cleaner to do its work, then flush.

**For Sinks, Faucets, Counters & Partitions:** Dilute **RESTROOM RESCUE** with water and apply as a spray or with a sponge. Agitate or scrub as needed to remove stains and soils. Let product set for a minute or two to remove tough hard water stains. Rinse with plenty of water. **RESTROOM RESCUE** cleans as it clings to the surface. Test metal surfaces for compatibility and always rinse cleaned surfaces with water.

**Additional Information**

**RESTROOM RESCUE** is a premium quality bath & bowl cleaner specifically designed for the toughest soils found in today's high-traffic restrooms. This product is also very versatile in that it can be diluted with water for daily cleaning and lighter soils. The largest cost associated with restroom maintenance is the labor involved in the cleaning process. In a high traffic restroom, cleaning is done several times a day. Using Restroom Rescue will reduce the labor required to remove stubborn soils, rust stains, hard water stains, dried urine deposits, darkened tile grout, mildew and algae stains and much more. **RESTROOM RESCUE** cleans tough stains with little or no scrubbing making the cleaning task much less time consuming and therefore much less of a labor expense. No longer will badly stained toilets and sinks need to be replaced. **RESTROOM RESCUE** removes the "permanent ring", rust stains under the rim and caked on hard water stains restoring your restroom fixtures to "like new condition". Contact your local **SUPERCO** representative for information and a demonstration of **RESTROOM RESCUE**.
