

The YES Company!!

**RINSE**

**SALT & ICE MELT RINSE**

**NEUTRALIZES CORROSIVE FILM LEFT BY ICE MELT CHEMICALS**

**USE ON:**

- TRUCKS • METAL SURFACES
- PLOWS • HEAVY EQUIPMENT

**EFFECTIVE AGAINST:**

- ICE MELT CHEMICALS
- SALT RESIDUE

**Product # 5710**

**FOR PROFESSIONAL USE ONLY**  
CONSULT LABEL AND MSDS BEFORE USING.

# RINSE

**RINSE** is an industrial strength rinsing compound which has been developed specifically to cut through the dulling, white chalky residue left behind by ice melting products. **RINSE** neutralizes the corrosive film left behind without harming sensitive painted or finished surfaces.

## DIRECTIONS:

For daily damp mopping use 1 to 3 ounces per gallon of water. Apply liberally to floor with mop, allowing the solution to act for several minutes. Rinse immediately with clean water, wringing out mop frequently.

To remove heavy film from equipment, dilute 6 ounces per gallon of water. Allow to act for several minutes, then rinse or pressure wash off with clean water.

To eliminate carpet stains left by ice melting residue, use 1 to 3 ounces per gallon of water in carpet extraction equipment. Do not use a hot solution and do not mix this product with any other chemical.

**INGREDIENTS**  
SULFAMIC ACID

**CAS NUMBER**  
5319-14-6

## Additional Information

**RINSE** is designed to cut through the dull white chalky residue that is left behind by ice melting chemicals. **RINSE** dissolves the salt residue and ice melt chemicals without harming painted or finished surfaces. Use **RINSE** on trucks, plows and heavy equipment as a regular part of maintenance to help prevent rust and corrosion. For more information on **RINSE**, contact your local Superco Specialty Products representative.
