SLEEP TIGHT
NON-FRAGRANT BED BUG KILLER

SLEEP TIGHT is a water-based pesticide developed especially to control bed bugs. When applied as directed on the labeling, **SLEEP TIGHT** will kill bed bugs on contact. 100% mortality occurs within 5-10 minutes of application, depending on life stage. **SLEEP TIGHT** is also effective on other insects, cockroaches, ants, millipedes, carpet beetles, and fleas. Any of the listed insects coming into contact with a surface treated with **SLEEP TIGHT** will be killed for up to 30 days after application.

SLEEP TIGHT kills the listed insects by breaking down the waxy outer layer on the insect's body. Once the waxy layer is broken down, the insect begins losing internal moisture, causing dehydration, and eventual death. Once applied, a certain amount of the active ingredient is stored in a crystalline structure which is included in the inert ingredients in **SLEEP TIGHT**. Once dry, if an insect disturbs this structure the active ingredient is released onto the body of the insect, causing death by dehydration.

SLEEP TIGHT is non-toxic to all mammals and will not harm the environment when used as directed. Items treated may be used as soon as they are dry.

Use **SLEEP TIGHT** anywhere bedbugs are found: Homes, hotels, motels, hostels, hospitals, dormitories, autos, moving vans, airplanes, buses, trains, theaters, auditoriums.

ACTIVE INGREDIENTS:	
Soybean Oil	0.78%
Cinnamon	0.09%
OTHER INGREDIENTS:	
Sodium Benzoate (as preservative)	0.78%
Calcium Silicate	0.78%
Aluminum Sodium Silicate	0.59%
Iron Oxide	0.49%
Magnesium Silicate	0.48%
Water	96.01%
TOTAL	100.00%

DIRECTIONS FOR USE:

Each bottle will treat an area up to 300 square feet and any furnishings in the room to be treated. This would be a room size of 15 ft. X 20 ft. It is not necessary to treat hardwood floors, tile or linoleum flooring in bath room areas. **Preparing the area to be treated:** Remove all debris from all floors, closets, drawers, shelves, cabinets and other enclosed areas. Vacuum carpets and place vacuum bag and debris into tightly sealed plastic bags and dispose of promptly. Move all furnishings away from walls to allow access. Remove all drawers from all furniture and place drawers on end so the inside and underside of all drawers are exposed. Remove all cushions and pillows from all chairs and couches. Close all drapes so the surfaces may be sprayed. Remove any headboards and headboard supports, pictures, wall hangings and any other fixtures so **SLEEP-TIGHT** can be applied to all surfaces. Remove all bedding and pillow cases from all beds, place in plastic bags and launder. Replace after treatment has been completed. Separate the box spring from the mattress so the entire bed frame, its railings and wheel or support assemblies are exposed. Remove cloth from bottom of box spring and spray inside box springs. Carefully dispose of cloth as it may harbor eggs. Turn off any fans or forced air units during treatment. Place trigger sprayer into bottle. Be sure sprayer is completely seated. Be sure sprayer is off. **SHAKE BOTTLE VIGOROUSLY PRIOR TO APPLICATION. DURING APPLICATION SHAKE BOTTLE VIGOROUSLY EVERY 10 TO 15 MINUTES.** Turn sprayer to setting for applying a mist, not a stream. Apply to all surfaces. Porous surfaces should be sprayed so they are just damp, not to saturation. Carpets should also be sprayed. In rooms or areas with limited carpeting, cracks and crevices should be treated with the sprayer set to a stream setting. Surfaces should be allowed to dry before re-occupying the treated area. Hold nozzle back 30 inches from spray area. Keep sprayer moving at a rate of 3-4 feet of area per second. Do not overlap treated areas. Treat all surfaces including drapes, drawer surfaces, furniture joints, baseboards and other surfaces in the room. Be sure to treat all sides of surfaces on cushions, mattresses, bed springs, drawers, etc. **For carpets,** start with all areas underneath or covered by beds, couches, chairs and treat as above with the mist setting. Then treat all other carpet areas starting with the area farthest away from the exit, working towards the exit door. Once all surfaces have been treated, allow sufficient time for **SLEEP-TIGHT** to dry. Once all surfaces are dry, replace all furniture, drawers, etc. to proper locations. Place freshly laundered bedding on mattresses and pillows. Lightly spray bedspread or comforter. Will continue to kill listed insects for up to 30 days after application.
