REMOVES THE IMPOSSIBLE HARD WATER STAINS ON GLASS AND WINDOWS CAUSED BY SPRINKLER SYSTEMS

Product # 3014 Quarts

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

SPOT FADE Q
Glass and Window Spot Remover

SPOT FADE Q makes glass and window spot removal easy! **SPOT FADE Q** removes the impossible hard water stains from glass and windows caused by sprinkler systems and rainwater.

DIRECTIONS FOR USE:

Always test the surface to be cleaned in an inconspicuous area to determine if the surface is sensitive and to calculate the length of time the product should stay in contact with the glass surface. Apply to surface. Scrubbing or agitation will speed up the cleaning process and is recommended on badly stained surfaces. Work from the bottom up. Do not allow cleaner to dry on glass. This product works fast and caution should be taken not to let the product come in contact with or to dry on the window frame. After the product has done its work, rinse off thoroughly with plenty of clear water.

SULFURIC ACID	7664-93-9

Additional Information

SPOT FADE Q was developed for use where other products have failed. **SPOT FADE Q** contains a space liquid pumice formulation that lets you get rid of unsightly water spots caused mainly by sprinkling systems and rainwater. This product is not meant to be used as a window cleaner. It is too strong for daily use. Use on spots and stains that your window cleaner will not remove. Contact your local **Superco Specialty Products** representative for a demonstration.
