SUPER 28
 Concentrated Non-Butyl Degreaser

SUPER 28 Concentrated Degreaser is recommended for fast, safe removal of grease, oil, ink, carbon and heavy soil from concrete, hard floor surfaces, metal and machinery. This product is excellent for use in automatic floor scrubbing equipment.

DIRECTIONS FOR USE:

For automatic scrubbing equipment dilute as follows:
 Light soil 40:1 - Medium soil 20:1 - Heavy soil 10:1

For other uses, by machine or hand dip:
 1 part cleaner to 40 parts water - Light duty cleaning of floors, walls, metal furniture, lighting fixtures, glass and ceramic surfaces.
 1 part cleaner to 16 parts water - Cleaning industrial equipment, trucks, tractors, machinery, dies, sump and coolant lines.
 1 part cleaner to 4 parts water - Degreasing metal surfaces such as grills, hoods, greasy walls, engine exteriors and removal of soft carbon.

Additional Information

SUPER 28 Concentrated Non-Butyl Degreaser is a powerful formula that is non-toxic in its diluted form. This remarkable cleaner is authorized by USDA for use in federally inspected meat and poultry plants and is usable in any facility that uses their guidelines. Designed specifically for industrial applications, **SUPER 28** is ideal for use at food processing plants, restaurants, dairies, canneries, wineries, bottlers, etc., as well as other industrial facilities, municipalities, grounds care departments, school districts, etc. This product is extremely versatile and is usable for a wide variety of surfaces and soil conditions by simply changing the dilution ratio. **SUPER 28** can be diluted perfectly for each and every use by installing an **SUPERCO Mixing Station System**. This system dilutes up to four **SUPERCO** products automatically to insure proper mixing and maximum economy. For more information on **SUPER 28** or the Mixing Station System, contact your local **SUPERCO** representative.
