SUPER FLY-AWAY

Helps Remove Drain Flies

- REDUCES FOOD SOURCES FOR DRAIN PESTS
- REDUCES BREEDING SITES FOR DRAIN PESTS
- ELIMINATES DRAIN AND SYSTEM ODORS
- IMPROVES DRAIN FLOW
- SPECIALIZED MICROBES PROVIDE RAPID DIGESTION OF ORGANIC HARBORAGES

Product: # 3254

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

SUPER FLY-AWAY

For Drain Flies, Gnats, and Moth Flies

Restaurants and other food preparation facilities often experience sanitation problems associated with the build-up of organic waste and grease in drains and grease traps. These problems include fruit and drain fly infestation, foul odors, and clogged drains. **SUPER FLY-AWAY** is a highly concentrated bacterial gel that actually digests grease buildup that accumulates over time. **SUPER FLY-AWAY** also controls foul odors by inhibiting the normal biological production of odor causing compounds such as hydrogen sulfide and rancid fatty acids that result from septic or anaerobic environments.

DIRECTIONS:

START-UP: If drain is not regularly used, moisten drain by pouring 1-2 gallons of water into drain. For all applications, Apply product at time of lowest drain use, ideally at the end of day after the use of all cleaning sanitation products has been completed. Add 8 ounces to each drain and grease trap in area. Apply around edge of drain. Repeat dosage daily as necessary usually for 5-7 days.

MAINTENANCE: Apply 4-8 ounces per drain or trap every week.

SUPER FLY-AWAY may also be sprayed in non-drain areas .
