**SUPER PTF LUBE**  
 DRY TEFLON®  
 LUBRICANT &  
 RELEASE AGENT

- NON-CHLORINATED
- NON-HEXANE
- CHEMICALLY INERT
- FAST-DRYING
- NON-OILY
- ODORLESS

PRODUCT #1060 Aerosol

**FOR PROFESSIONAL USE ONLY**  
 CONSULT LABEL AND MSDS BEFORE USING.

**SUPER PTF LUBE** is a chemically inert, non-oily, fast-drying lubricant and release agent made with an extremely fine Teflon® fluorotelomer powder. This product features outstanding microscopic film-forming properties and resists temperatures from -100° F to +500° F. An odorless, stainless coating that is more slippery than silicone, graphite or oil. Excellent for reducing low speed friction. The dry film is not affected by most chemicals and when used as a release agent, allows parts to be painted without cleaning.

**FOR SPECIALIZED USE:**  
**SUPER PTF LUBE** is designed for special commercial and industrial applications, works well on drawers, hinges, springs, pulleys, chain drives, plastics, rubber, metals, leather, wood, glass, paper and other smooth surfaces. Its applications are very numerous where machinery is used or wherever a release agent is required. May be used as a high-efficiency mold release.

**DIRECTIONS FOR USE:**  
 Shake vigorously before each use. Apply to a clean surface. Hold container 5 to 10 inches away from surface and spray a thin film on area to be treated.

POLYTETRAFLUOROETHYLENE	9002-84-0
LIQUIFIED PETROLEUM GAS	68476-85-7

## Additional Information

The fluorotelomer powder in **SUPER PTF LUBE** is one of the slipperiest substances known to man. This remarkable aerosol lubricant contains a fluorotelomer dispersion made by DuPont called VYDAX®. Dry to the touch after application and evaporation, the fine particles have excellent adhesion while providing superior lubricating properties. **SUPER PTF LUBE** is a clean, dry lubricant that is ideal for locks, hinges, drawers, doors and door jams because it is non-oily and invisible. **SUPER PTF LUBE** will not attract dust or dirt, will not dissipate or evaporate. An extremely wide temperature resistance make this product usable indoors and outdoors and can be painted over without having to be removed first. This feature makes **SUPER PTF LUBE** much more convenient than silicone sprays that have to be stripped or sanded off before doors and door jams can be repainted. **SUPER PTF LUBE** is ideal for use in areas where you want the lubricant to be clean, dry and invisible. An easy way to demonstrate the benefits and characteristics of **SUPER PTF LUBE** is to fold a plain piece of paper and rub the two halves together with your fingers and feel the friction between the paper. Then spray the inside of the folded paper with **SUPER PTF LUBE** and watch how fast the propellant evaporates and just how clean and dry the lubricant is that remains. Now, rub the two halves together again and feel the incredible difference made by this microscopic lubricant.
