

SUPER-STRIP Multi-Purpose Stripper

- REMOVES PAINT, GRAFFITI, VARNISH, WAX & SEALER BUILD-UP FROM BRICK, CONCRETE, WOOD, GLASS, METAL, PLASTER AND CINDER-BLOCK.

Product: #1008 Aerosol
Product: # 5018 Bulk

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

SUPER-STRIP Multi-Purpose Stripper is a powerful paint and varnish remover that is also strong enough to remove graffiti from brick and concrete. **SUPER-STRIP** is fast and easy to use. The gel based formula clings to vertical surfaces allowing good contact time even on walls and ceilings. Simply spray surface to be stripped and wait. **SUPER-STRIP** does all the hard work for you. For your convenience, **SUPER-STRIP** comes in aerosol cans as well as bulk containers. A thin bulk formula is available on request.

DIRECTIONS FOR USE:

1. Clean surface of heavy grease or oil. Make certain surface is dry.
2. SHAKE WELL.
3. Hold can 8-10 inches from surface. Apply heavy coat evenly to entire surface.
4. Let set until blistering action is complete and then several more minutes.
5. Scrape, wipe or flush with jet of water.
6. For heavily coated surfaces repeat after surface is again dry.
7. Clean valve after each use by inverting can and spraying a few short bursts. TEST SMALL INCONSPICUOUS AREA BEFORE USING

AEROSOL INGREDIENTS	CAS #	BULK INGREDIENTS	CAS #
METHYLENE CHLORIDE	75-09-2	XYLENE	1330-20-7
METHYLALCOHOL	67-56-1	METHYLENE CHLORIDE	75-09-2
TOLUENE	108-88-3	METHANOL	67-56-1
PROPANE	74-98-6		
BUTANE	106-97-8		

Additional Information

SUPER-STRIP is the most powerful multi-purpose stripper available. Many painting jobs can be tedious and time consuming due to excessive prep work. Removing several layers of old paint takes time and in many cases painting over these layers is not advisable. **SUPER-STRIP** is the solution to this problem. Its heavy-duty formula dissolves multiple layers of paint, varnish, sealers, wax, or a combination of these to make prep work much easier and less time consuming. Graffiti abatement, in many areas, requires more time each year. Sandblasting of concrete and cinder-block can be seen on a daily basis. These days, where labor costs are a constant concern, areas where graffiti is frequent often get painted over. This method, although less expensive than removal, leaves buildings looking almost as bad as they did with the graffiti. Ultimately the graffiti bleeds through the paint and we go back to square-one. Using **SUPER-STRIP** can eliminate the need to sandblast or paint-over concrete, cinder-block, brick, or stucco walls. **SUPER-STRIP** will not leave these surfaces discolored like sandblasting will. On surfaces that will have to be painted over **SUPER-STRIP** will completely remove all graffiti and affected paint to prevent any bleed-through. To win the battle against vandalism a company needs a good Graffiti Abatement Program. A program that has specific measures to handle all areas affected as well as preventive efforts. Consult your SUPERCO Representative for advice on developing a program that best suits your needs.
