

WEED-GANIC

**BROAD SPECTRUM
NON-SELECTIVE, POST
EMERGENT HERBICIDE**

- Safe Around Children And Pets
- Non Selective
- Similar Uses As Round Up
- Control of Grasses and Broadleaves
- Kills Weeds in 24 To 72 Hours
- Mode Of Action: Cell Membrane Disruptor
- Minimum-Risk Herbicide
- Water Based –Ready To Use
- EPA Exempt
- Accepted By: National Organics Program

**Product Code #5234
4x1 Gallons**

**FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.**

**WEED-GANIC
BROAD SPECTRUM, NON-SELECTIVE, POST
EMERGENT HERBICIDE
ORGANIC - USDA NOP COMPLIANT
PROVEN EFFICACY WITH GOVERNMENT, COUNTIES,
AND UNIVERSITIES
BROAD SPECTRUM CONTROL OF GRASSES AND
BROADLEAVES
KILLS WEEDS IN 24 TO 72 HOURS
MODE OF ACTION: CELL MEMBRANE DISRUPTOR
MINIMUM-RISK HERBICIDE**

Active Ingredients:	
Clove Oil	5.00%
2-phenethyl propionate	5.00%
Sodium Lauryl Sulfate	0.05%
Other Ingredients:	89.95%
(Water, Potassium Oleate, Sodium Bicarbonate, Lecithins)	

DIRECTIONS FOR USE:

Use only according with label instructions. Read the entire label before using this product. **SHAKE WELL BEFORE USING.** Do not dilute. This product is ready to use. **WEED-GANIC** is intended for non-selective weed control. Do not apply this product through any type of irrigation system. Apply undiluted product by use of a sprinkling can or other watering or spraying device. Apply when air is calm to avoid the possibility of drift onto desirable plants or grass. Maintain a homogenous spray mixture. Constant agitation or recirculation is required. Complete foliage coverage is essential to achieve control. For weeds greater than 10" in height, mowing is recommended prior to **WEED-GANIC** application.

Additional Information

For total weed control on areas around the home, the business, or any place where no plant growth is desired, use as specified in the label directions. Fast acting - kills broadleaves, grasses, and all unwanted vegetation on contact. The degree of control is less when the plants are inactive, mature, or biannual/perennial type. Will not spread to nearby plants. Will not harm or trans-locate through woody vegetation. **WEED-GANIC** does not damage the woody parts of plants such as rose canes, mature ornamental landscape plants, or trees. Do not allow spray solutions to drip, splash, or drift onto flowers, bedding plants, vegetables, indoor and outdoor environments. **WEED-GANIC** works best when applied during sunny days with temperatures over 60°F and weed growth is less than 4 inches. Cloudy days, cool weather, and weed growth greater than 4 inches may slow the activity of this product and delay or reduce efficacy. Coverage is very important. The better the foliage coverage, the better the product will perform. This product provides no residual weed control. Repeat treatments will be necessary for new plants emerging.

APPLICATION SITES:

WEED-GANIC may be applied in and around but not limited to the following sites: curbs and driveways, walkways and paths, patios, parking areas, play areas, along fence lines and around buildings where plant growth is undesirable.
