Additional Information

ATTACK Mildew and Algae Stain Cleaner is a no scrubbing, hassle free solution to stubborn mildew stains. Anywhere there is water, mildew and algae will form and create one of the most difficult stains to clean and remove. Many sprays will claim to kill mildew but most will not help after the algae has formed. **ATTACK** is a heavy duty cleaner that removes the toughest mildew and black algae without the need for scrubbing. **ATTACK** has proven to be effective even in humid climates found in the eastern and southern states where these stains can be even more difficult to remove. Use **ATTACK** where other products have failed to demonstrate the value of this unique formula. Hours of labor spent scrubbing mildew stains can add up to a large expense at the end of the year. Using **ATTACK** drastically reduces this labor cost by eliminating the time spent scrubbing and scraping. Simply spray the product onto the stained surface and for the next several minutes the maintenance person can continue to work while **ATTACK** tackles the mildew and algae stains. After the stains disappear just rinse clean.
