

BUST

Frees Frozen Nuts & Bolts
Fast Acting Penetrating Formula
for Loosening Rusted Parts

- LOOSENS RUSTED NUTS & BOLTS
- LUBRICATES & PENETRATES
- IMPROVES ELECTRICAL PROPERTIES
- PROTECTS AGAINST RUST & CORROSION

Product: # 1616 - 16 oz. Aerosol
Product: # 5133 - Bulk

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

INGREDIENTS	CAS#
** AEROSOL **	
Carbon Dioxide	124-38-9
Mineral Seal Oil	64741-44-2
Tetrachloroethylene	127-18-4
Sorbitan Monooleate	1338-43-8
** BULK **	
Heavy hydrotreated naphthenic distillates	64742-52-5
trichloroethylene, trichloroethane	79-01-6
Distillates (petroleum), solvent-refined heavy paraffinic	64741-88-4

Made in USA

making it the ideal penetrating lubricant. For a product of this type to work well it has to be able to do four things; **Displace moisture** because often times the machinery may be wet, **Dissolve grease**, **Penetrate** into frozen parts and **Break loose rust and corrosion**. This process would normally require 2 or 3 different products. Not any more. We have formulated **BUST** with the ability to do all these jobs quickly and easily in order to make your work faster and less trouble some. If you have ever sheared off a bolt head and had to take the time and effort required to drill, tap and remove the broken bolt, then you understand how important a penetrating lube can be.

BUST
Nut and Bolt Loosener
MEETS MIL. SPEC C-23411
• Non-Conducting • Never Dries
• Prevents Corrosion

DIRECTIONS FOR USE:

Spray nuts and bolt heads liberally, let set and the fast penetrating formula goes to work. **BUST** cuts through grease, displaces any moisture, penetrates and loosens any rust or corrosion making it easy to separate the surfaces. Repeat as necessary. Spray nuts and bolts before assembly.

For wet ignition systems: Remove distributor cap and spray directly onto contacts to restore system.

For wet breakers and switches: Spray directly onto wet contacts to restore connection.

RECOMMENDED USES:

Airplanes, automobiles, farm equipment, motors, windings, generators, transformers, steel, copper, brass, aluminum, iron, bronze, etc. Use for in-plant maintenance, refrigeration equipment, locks, hinges, moving parts, stops corrosion on battery terminals.

Authorized by USDA for use in federally inspected meat and poultry plants.

Additional Information

BUST is a revolutionary product that features fast penetrating action and the power to break free rusted or seized parts. **BUST** also displaces moisture and is nonflammable and nonconductive
