DE-SCALE
Concrete Brightener and Cleaner

- **DE-SCALE** cleans and brightens all concrete.
- **DE-SCALE** flushes out hidden deposits.
- **DE-SCALE** Removes rust in seconds.
- Use on all masonry surfaces.
- Use on and at Ready-Mix companies.

DIRECTIONS FOR USE:

For concrete or masonry surfaces:

Dilute 1 part cleaner with 4 parts water. Apply **DE-SCALE** into the pores of the surface. Allow to stand or "work" until the product has stopped foaming and rinse with water. **DE-SCALE** will also clean the inside of swimming pools and pool decks.

For ready-mix trucks and equipment, apply to mixer and surrounding areas, not on enamel paint surface of truck cab.

DE-SCALE is authorized by USDA for use in federally inspected meat and poultry plants.

DE-SCALE HD (Heavy Duty):

Use as above however use higher dilution rates of 1 part cleaner with up to 20 parts water. Stronger mixtures of **DE-SCALE**

HD will remove excess Portland Cement even after curing.

The recommendations for dilution rates are given as a suggestion only. Your experience in the field and the severity of soil conditions may dictate a stronger or weaker solution.

Additional Information

DE-SCALE and **DE-SCALE HD** Concrete Cleaners are powerful products that are amazingly easy to use. Simply prepare the working solution as described on the label, spray on and let stand, then rinse. No scrubbing or scraping is necessary to return your concrete to a new appearance. **DE-SCALE** removes discoloration caused by rust, scale, mineral deposits, algae and sloppy cement patchwork. This product is popular with ready-mix concrete companies who use it to clean the mixers, trucks, trailers and other areas that get splashed with cement. Another common use for **DE-SCALE** is to remove rust stains, caused by leaking automobile radiators, from parking areas, sidewalks and maintenance shop floors. **DE-SCALE** lightly etches concrete and is the ideal product to prep concrete for painting. Use this product to clean exterior concrete stairs that tend to get slippery in wet weather. After cleaning, **DE-SCALE** will leave the surface slightly more aggressive and provide a safer surface to walk on. This product is one you must see in action in order to appreciate the performance. Contact your local SUPERCO representative for a demonstration of **DE-SCALE** and **DE-SCALE HD**.
