GLEAM
Oil-Based Stainless Steel and Metal Polish
GLEAM Stainless Steel and Metal Polish is an excellent cleaner formulated for hospitals, schools, offices, hotels, restaurants, locker rooms, restrooms, factories and institutional use. **GLEAM** cleans, brightens, polishes and protects stainless steel. Can be equally effective for use on aluminum, chrome, Formica, porcelain and ceramic tile. A minimum of effort is required to remove smudges, soil and stains quickly, no hard rubbing needed. It actually forms a shield that resists water marks and rusting.

DIRECTIONS FOR USE:
Shake well. Holding container 6 to 12 inches from surface to be cleaned, spray product sparingly and wipe clean. Polish immediately with dry cloth or paper towel. May also be used to clean chrome, tile, porcelain and Formica.

Additional Information

GLEAM Stainless Steel and Metal Polish is an exceptional product. Stainless steel polishes are common products and most of the people that use them on a regular basis will tell you that they are all pretty similar. Most smell like paint thinner or some kind of solvent and they will generally irritate office workers, tenants and guests, basically the people you are hoping to please by doing the cleaning in the first place. **GLEAM** is unique because of the pleasant fragrance left behind after treatment. Switching from a conventional stainless steel polish to **GLEAM** will surely bring compliments from not only from the general public but from the maintenance staff as well. **GLEAM** uses a specially designed spray valve that dispenses the product with a light fan spray that eliminates over use. **GLEAM** is excellent for use on a number of surfaces found at virtually all facilities. Use on porcelain, chrome, Formica, ceramic tile, brass, copper, aluminum to bring an attractive shine as well as provide a protective barrier against rust, corrosion and oxidation. Many metal surfaces like brass and copper start oxidizing and tarnishing immediately after being polished with a paste type polish. This happens because paste or abrasive cleaners leave the metal without any protection so that moisture from the air and oil from fingerprints discolor the surface quickly. Use **GLEAM** on these frequently polished areas to remove fingerprints and provide a protective barrier and you will not have to polish them as often. **GLEAM** can be a big labor saver at restaurants, night clubs, country clubs, hotels, office buildings and theaters or anywhere with metal surfaces to maintain. Contact your local **SUPERCO SPECIALTY PRODUCTS** representative for more information and a demonstration of this remarkable product.
