

The YES Company!!

PENTRAIT PLUS
PENETRATING LUBRICANT

CONTAINS TEFLON AND MOLY
NON-CHLORINATED

- LOOSENS NUTS, BOLTS, AND FITTINGS
- FREES RUSTED AND CORRODED PARTS
- STOPS SQUEAKS

Product: #1093 Aerosol

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

PENTRAIT PLUS Penetrating Oil has excellent penetrating power for loosening frozen and rusty corroded parts. **PENTRAIT PLUS** quickly displaces moisture from ignition systems on autos, trucks, farm and commercial equipment. Protects against corrosion on most unpainted metal surfaces. May damage certain plastics, painted or lacquered surfaces. Provides excellent lubrication from the addition of both Teflon and molybdenum disulfide working together to stop squeaks and binding on cams, wheel, chairs, hinges, locks, rollers, etc.

DIRECTIONS FOR USE:

For best results spray a liberal amount on frozen part and tap the joint lightly. Penetration will occur within minutes. On deep corrosion, a second application may be necessary.

WET ENGINES: Remove distributor cap and using extension tube, spray entire electrical system lightly.

INGREDIENTS
Aliphatic Mineral Spirits
Mineral Oil
Polytetrafluoroethylene
Carbon Dioxide Propellant

CAS NUMBER
64741-65-7
8042-47-5
9002-84-0
124-38-9

Additional Information

PENTRAIT PLUS Penetrating Oil is an advanced formula that combines deep penetration with long lasting lubrication. **PENTRAIT PLUS** is fortified with Teflon and molybdenum disulfide, the two most advanced solid lubricants. These materials are added to a blend of petroleum oils and penetrating agents to provide fast action and excellent power to loosen rusted or corroded part. **PENTRAIT PLUS** preserves metal and protects these surfaces from rust, corrosion and moisture. The Teflon and moly added to the formula give superior lubrication that remains long after the oils evaporate. This feature makes **PENTRAIT PLUS** ideal for locks, hinges, rollers, tracks, cables and mechanical equipment of all kinds. **PENTRAIT PLUS** truly displaces moisture making it equally effective on wet surfaces and for restoring water-shortened circuits such as distributors, sprinkler valves, outdoor and marine applications. Use **PENTRAIT PLUS** where other “WD” type products have failed or proved to be insufficient to do the job. Contact your local **SUPERCO** representative for information on one of the most comprehensive line of lubricants on the market today.
