

The YES Company!!

RED PROTECTA
RED INSULATING VARNISH

QUICK DRY, FLEXIBLE, NON-CONDUCTIVE
COATING INSULATES & PROTECTS
ELECTRICAL EQUIPMENT

- Resists Chemical, Oil, and Moisture
- Protects Electrical Equipment against Moisture & Corrosion
- Reduces Current Leakage
- High Dielectric Strength / Arc Resistance
- Helps Prevent Short Circuiting and Flash-Off

FOR USE ON:

- Motor Windings • Commutator Ends
- Field Coils • Armatures • Bus Bars
- Switchboard Components • Exposed Metal Parts

FOR USE BY:

- Electrical Supply • Motor Rebuilders
- Industrial Maintenance Shops
- Manufacturing Plants • Utility Plants

Product # 1134

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

RED PROTECTA

RED INSULATING VARNISH

RED PROTECTA is a quick dry, flexible, non-conductive coating that insulates and protects electrical connections and equipment. **RED PROTECTA** quickly dries to a tough, glossy, flexible coating that protects electrical equipment against moisture and corrosion. **RED PROTECTA's** film resists cracking and chipping and exhibits high arc & high dielectric strength. Once dry, the surface resists current leakage insuring optimal efficiency of electrical equipment. **RED PROTECTA** strengthens and repairs worn out insulation and helps prevent short circuiting and flash-off.

APPLICATIONS:

Excellent protective coating for electrical equipment including motor windings, commutator ends, field coils, armatures, switchboard parts, bus bars, and other exposed metal parts. Effective as a finish coat.

DIRECTIONS

1. Surface must be clean and dry before painting. for best results, use when can is between 70° and 90°F (21° and 32°C).
2. Shake can at least one minute before and occasionally during use.
3. Spray surface with steady even strokes at a distance of 8 to 10 inches (20 to 25cm). Several light coats give a better finish than one heavy one.
4. If clogging develops, turn spray button 1/4 turn or remove and clean button slot. Do not stick objects into can opening.
5. After painting, turn can upside down and spray for 2 seconds to clean spray button.
6. Discard empty can in trash pick up. Do not incinerate or compact.

INGREDIENTS

ACETONE
PROPANE
RED IRON OXIDE PIGMENT
n-BUTANE
TOLUENE
n-BUTYL ACETATE
GLYCOL ETHER EP
ISOPROPYLALCOHOL
XYLENE (MIX)

CAS NUMBER

67-64-1
74-98-6

Additional Information:

RED PROTECTA is a quick drying, tough glossy insulating coating that helps protect electrical equipment against moisture and corrosion. **RED PROTECTA** resists chemicals, oil, and moisture, reduces current leakage, has high dielectric strength / Arc resistance, and helps prevent short circuiting and flash-off. Use **RED PROTECTA** for motor windings, commutator ends, field coils, armatures, switchboard components, bus bars and exposed metal parts. For more information on **RED PROTECTA**, contact your local Superco Specialty Products Representative.
