

The YES Company!!

WINTER WAX
WINTERIZING WAX

- Keeps snow from sticking to snow removal equipment, plows, shovels & blades
- Helps increase the efficiency of snow removal, material handling, turf maintenance and road equipment
- Protects Metal Surfaces, Fiberglass, Painted & Plastic Surfaces
- Helps prevent salt corrosion
- Contains no CFC's

Product # 1137

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

WINTER WAX
WINTERIZING WAX

WINTER WAX is a special blend of silicone and wax that provides a slick, nonstick coating that prevents ice and snow from sticking to plows, shovels and other snow removal equipment. Treated surfaces also become water and rust resistant. **WINTER WAX's** coating provides superior release action and lubrication to reduce drag and sticking of many materials to metal and other surfaces. **WINTER WAX** helps increase the efficiency of snow removal, material handling, turf maintenance and road equipment.

DIRECTIONS:

SHAKE WELL BEFORE USING. Spray surface from a distance of 12 to 14 inches. Allow a moment for wax coating to set up before putting equipment into operation. After use, invert can and spray a short burst to clear valve.

INGREDIENTS

Hexane
Alphatic Petroleum Distillates
Polydimethylsiloxane
Liquified Petroleum Gas

CAS NUMBER

110-54-3
64742-89-8
63148-62-9
68476-85-7

Additional Information:

WINTER WAX is a combination of silicone and wax that is designed to prevent ice and snow from sticking to snow removal equipment such as plows, shovels and blades. **WINTER WAX** is so versatile that in springtime it can be sprayed on the blades and under decks of grass cutters and movers to keep the grass from sticking to the blades and undercarriage which lessens drag and increases efficiency. For more information on **WINTER WAX**, contact your local Superco Specialty Products Representative.
